WHAT WE DO

Environmental control units, done properly.

An environmental control unit lets someone operate lights, doors, TV, phone and more from a single place, using a switch, a tablet or voice.

- Planned around the person and the therapist recommendation
- A free site visit with measurements and photos
- Itemised written quote a plan manager or funder can follow
- Walk-through and sign-off at handover

WHAT IT COVERS

What we supply and install

- Dedicated ECU systems
- Smart hubs configured as ECUs
- Switch interfaces and mounts
- Infrared and radio controllers for TV and appliances
- Bed and door controllers

Planned with you

We start with what is hard at home, not a product list.

Done properly

Licensed trades where the work needs them, tested on site.

Clear quote

Itemised, so a plan manager or funder can follow it.

Local team

HOW IT WORKS

From first call to handover.

1. **You call or send an enquiry**
   We ask what is hardest and who is involved. No sales script.
2. **Free site visit**
   We measure, photograph and talk through options. Therapists can join.
3. **Written quote**
   Itemised and linked to the recommendation.
4. **The work**
   Done by the right trades. We tell you before anything changes.
5. **Handover**
   Walk-through, sign-off, photos and invoice to whoever needs them.

COMMON QUESTIONS

Straight answers.

Who decides how the person accesses it?
The therapist decides the access method. We install and configure to that.

Is an ECU the same as a smart home?
They overlap. An ECU is set up for one person's access needs and is often more robust. Many homes use a mix of both.

Who programs it?
We do, to the therapist's specification, and we train the person and carers at handover.
