WHAT WE DO

Stove and appliance safety, done properly.

Cut-offs and monitors that reduce the risk of cooking and appliance accidents, chosen to suit your stove and the person.

- Planned around the person and the therapist recommendation
- A free site visit with measurements and photos
- Itemised written quote a plan manager or funder can follow
- Walk-through and sign-off at handover

WHAT IT COVERS

What we supply and install

- Stove safety cut-off devices
- Induction cooktops with auto-off
- Smart plugs with timers and remote shut-off
- Heat and smoke alarms for kitchens
- Appliance monitors with alerts

A cut-off or timer

Devices can cut power after a set time or when no movement is detected. Which one suits depends on the stove.

Auto shut-off appliances

Many kettles and appliances switch off automatically. We can check what is in the home.

Controls that suit the person

Front-mounted controls and clear markings can make a stove easier to use.

Monitoring rather than removal

A monitor can alert family if the stove has been on too long, without taking independence away.

HOW IT WORKS

From first call to handover.

1. **You call or send an enquiry**
   We ask what is hardest and who is involved. No sales script.
2. **Free site visit**
   We measure, photograph and talk through options. Therapists can join.
3. **Written quote**
   Itemised and linked to the recommendation.
4. **The work**
   Done by the right trades. We tell you before anything changes.
5. **Handover**
   Walk-through, sign-off, photos and invoice to whoever needs them.

COMMON QUESTIONS

Straight answers.

Does it work with any stove?
It depends on the stove type. We check at the visit.

Does a cut-off work on any stove?
It depends on the stove type and wiring. Electric stoves are usually straightforward; gas needs a different solution. We check at the visit.

Can family get an alert?
Yes, some devices send a notification when the stove is left on or switched off automatically.
